Study in Australia! Learn more at ie3global.org

IE3 Global has two university partners in Australia. Students enroll directly in the university for an authentic, immersive Australian experience.

Deakin University is proud of its vibrant, culturally-rich learning environment—celebrating differences and believing inclusive societies are stronger, more robust, and more interesting to learners. With three different campus locations, the Deakin program offers several unique lifestyle options and a variety of study opportunities, including arts and education, business and law, health, and science.

James Cook University is surrounded by the spectacular ecosystems of the rainforests of the West tropics, the dry savannas, and the iconic Great Barrier Reef. The two unique campus locations encourage students to study in diverse physical environments and to participate in specialized course field trips to some of Australia's most beautiful regions. A wide variety of subjects and courses are available to fit nearly all majors.

Duration: Semester or academic year

To participate:

- Sophomore standing or above
- 2.75 GPA (Deakin); 2.8 GPA (JCU) or higher
